Assembly Bill No. 57

CHAPTER 685

An act to add Section 65964.1 to the Government Code, relating to telecommunications.

[Approved by Governor October 9, 2015. Filed with Secretary of State October 9, 2015.]

LEGISLATIVE COUNSEL’S DIGEST

AB 57, Quirk. Telecommunications: wireless telecommunication facilities. Existing law requires a city, including a charter city, or county to administratively approve an application for a collocation facility on or immediately adjacent to a wireless telecommunications collocation facility, as defined, through the issuance of a building permit or a nondiscretionary permit, as specified. Existing law prohibits a city or county from taking certain actions as a condition of approval of an application for a permit for construction or reconstruction for a development project for a wireless telecommunications facility.

Under existing federal law, the Federal Communications Commission issued rulings establishing reasonable time periods within which a local government is required to act on a collocation or siting application for a wireless telecommunications facility.

This bill would provide that a collocation or siting application for a wireless telecommunications facility is deemed approved if the city or county fails to approve or disapprove the application within the reasonable time periods specified in applicable decisions of the Federal Communications Commission, all required public notices have been provided regarding the application, and the applicant has provided a notice to the city or county that the reasonable time period has lapsed.

The people of the State of California do enact as follows:

SECTION 1. Section 65964.1 is added to the Government Code, to read: 65964.1. (a) A collocation or siting application for a wireless telecommunications facility, as defined in Section 65850.6, shall be deemed approved if all of the following occur:

(1) The city or county fails to approve or disapprove the application within a reasonable period of time in accordance with the time periods and procedures established by applicable FCC decisions. The reasonable period of time may be tolled to accommodate timely requests for information required to complete the application or may be extended by mutual
agreement between the applicant and the local government, consistent with applicable FCC decisions.

(2) The applicant has provided all public notices regarding the application that the applicant is required to provide under applicable laws consistent with the public notice requirements for the application.

(3) (A) The applicant has provided notice to the city or county that the reasonable time period has lapsed and that the application is deemed approved pursuant to this section.

(B) Within 30 days of the notice provided pursuant to subparagraph (A), the city or county may seek judicial review of the operation of this section on the application.

(b) This section does not apply to eligible facilities requests.

(c) The Legislature finds and declares that a wireless telecommunications facility has a significant economic impact in California and is not a municipal affair as that term is used in Section 5 of Article XI of the California Constitution, but is a matter of statewide concern.

(d) As used in this section, the following terms have the following meanings:

(2) “Eligible facilities request” has the same meaning as in Section 1455 of Title 47 of the United States Code.

(e) Except as provided in subdivision (a), nothing in this section limits or affects the authority of a city or county over decisions regarding the placement, construction, and modification of a wireless telecommunications facility.

(f) Due to the unique duties and infrastructure requirements for the swift and effective deployment of firefighters, this section does not apply to a collocation or siting application for a wireless telecommunications facility where the project is proposed for placement on fire department facilities.
